

Security Policy

Supported Versions

We actively support the following versions of the GitHub Spec Kit Training Program:

Version	Supported
1.0.x	:white_check_mark:
< 1.0	:x:

Reporting a Vulnerability

We take security vulnerabilities seriously. If you discover a security vulnerability in the GitHub Spec Kit Training Program, please report it responsibly.

How to Report

1. **DO NOT** create a public GitHub issue for security vulnerabilities
2. Send an email to the repository maintainers with details
3. Include the following information:
 - Description of the vulnerability
 - Steps to reproduce the issue
 - Potential impact assessment
 - Any suggested fixes (if available)

What to Expect

- **Acknowledgment:** We will acknowledge receipt of your vulnerability report within 24 hours
- **Initial Assessment:** We will provide an initial assessment within 72 hours
- **Updates:** We will keep you informed of our progress throughout the investigation
- **Resolution:** We aim to resolve critical vulnerabilities within 7 days
- **Disclosure:** We will coordinate with you on responsible disclosure timing

Security Best Practices

When using this training program:

- Keep your development environment updated
- Use secure authentication methods
- Follow the principle of least privilege
- Regularly review and update dependencies
- Report any suspicious activity or potential vulnerabilities

Contact

For security-related questions or to report vulnerabilities, please contact the repository maintainers through GitHub's private vulnerability reporting feature or create an issue using our security template.

Thank you for helping keep the GitHub Spec Kit Training Program secure!
